NO. 23

BRADLEY WILSON AND FOUR OTHERS

Indicted By the Daviess
Grand Jury.

SERIOUS CHARGES PREFERRED
Conviction Means From One
to Five Years In the
Penitentiary.

THREATS ARE ALSO ALLEGED

The Owensboro Messenger of Sunday says:

Resulting from a searching investigation covering a period of nearly four days, the Daviess county grand jury on Saturday afternoon returned into Circuit Court an indictment against John Gattton, Court Masters, Henry Ambrose, Bradley Wilson and Martin Weaver, charging them and each of them, with confederating together and banding themselves together for the purpose of intimidating, alarming and disturbing another person.

The indictment grew out of an occurrence which took place in front of the residence of Esq. Wm. G. Riney, near West Louisville, last November, and in which it was stated some forty or fifty persons took part. Following a meeting of a secret organization at West Louisville, in which there were estimated to be in the neighborhood of 200 men present, a number of persons who are said to have taken part in the affair, rode to a short distance above the house of 'Squire Riney, where they halted and, it is alleged, formed in line, two abreast and marched back and forth in front of the Magistrate's residence.

The great majority of those present at the meeting, so it was reported, were not in favor of such tactics, and remonstrated against them. In fact, 'Squire Riney was called up, following the meeting, and warned of what was to take place. He had, however, been admonished of the affair some ten days previous. Mr. Riney did not believe that the action would be taken, but some six or eight of his closest neighbors, practically all of whom were members of the organization, prevailed upon him to allow them to stay with him during the night. These men claimed they recognized the voice of the leader of the band of men.

Mr. Riney was formerly president of the Green River Tobacco Growers association. At the time he resigned, it was stated that he quit the organization as a result of threats that were made against him. On several occasions, it is stated, friends informed him of the threats that were made against him, and the names of the persons who are alleged to have inspired them were given to him. The indictment that was returned Saturday covers not only the demonstration in front of Mr. Riney's residence, but the threats and various tactics that are claimed were used for the purpose of intimidating him.

Following out the instruction given by Commonwealth's Attorney Ringo, the grand jury began a searching investigation of the reported lawlessness in Daviess county. It is understood that many witnesses voluntarily went before the grand jury and gave testimony regarding lawless acts that have existed in Daviess county for more than a year. Practically all of the testimony was along one line.

Practically every county official was summoned before the grand jury and compelled to give testimony. They were questioned about having joined the secret organization during the last county campaign. This testimony was taken down by the court stenographer, together with the testimony of every other witness, and was filed with the court for the use of future grand juries. It is said that a great deal of this testimony would make interesting reading.

John Gattton, one of the indicted, resides west of Sorgo, and near Curdsville. He is a well-known farmer. Court Masters is a rural mail carrier out of Stanley. Henry Ambrose is a farmer who resides west of West Louisville, and Martin

Weaver is a farmer who resides west of Owensboro.

Bradley Wilson, who is also indicted, came to Owensboro about one year ago from Madisonville, Hopkins county. He came here for the purpose of organizing the Consolidated Tobacco Growers association, composed of the counties in the Green River and Stemming districts. However, the organization was confined to the Green River district. Mr. Wilson was the chief organizer for the Consolidated, and was instrumental in hundreds of farmers joining the organization. J. P. Hobson, of McLean county, was the general sales agent of the Consolidated, but he recently resigned. Ernest Howell, O. D. Hazelrigg and Ollie Boulware served as county chairman at various times of the Consolidated. Mr. Boulware being the last one, resigning shortly after the Consolidated pool was turned loose.

Mr. Wilson was speaking in Livermore on Saturday, and did not learn of the indictment against himself until his return to Owensboro last night.

Upon conviction, the punishment for an offense similar to that charged in the indictment preferred against the five men, is confinement in the penitentiary for a period of not more than five nor less than one year. Up to the adjourning of court last night none of the indicted men had surrendered themselves. The bonds of each was fixed at \$250, and bench warrants were issued immediately.

Members of Grand Jury.

George H. Cox, W. H. Duncan, J. B. Burton, S. B. Lee, R. H. Glover, W. E. Lashbrook, H. F. Coombs, W. R. Skillman, K. Y. Birkshire, Ben F. Pruden, J. E. Greenwell, M. C. Bassett.

Wilson Wants Speedy Trial.

Owensboro, Ky., June 7.—Bradley Wilson, chief organizer for the Consolidated Tobacco Growers' Association, who was indicted by the Daviess county grand jury yesterday, together with four others, on the charge of banding and confederating for the purpose of intimidating, has addressed an open letter to Circuit Judge T. F. Birkhead in which he asks that a special term of court be called for the purpose of giving him a speedy trial. He also charges that the action of the grand jury was influenced by the American Tobacco Company.

CONVICT DIED OF JOY
WHEN HIS RELEASE CAME

Leavenworth, Kan., June 6.—"Davy" Truax, eighty-two years old, died of joy at the State Prison here yesterday. "Davy" had been a prisoner twenty-five years, but he was not a convict when he died. He had his parole papers clutched tightly in his hand.

The old man, a member of the Ninety-first New York Infantry in the Civil War, was an inmate of the Soldiers' Home at Dodge City when he killed one man and wounded another in a quarrel over liquor. He never lost hope. He believed he would be released some day and in order that he might not be buried in a pauper's grave he saved \$150. from his pension.

Tuesday the old man's faith was confirmed when he was notified that he had been granted a parole. Yesterday he was ready to go home. He sat joyously in the prison executive office, waiting for the car which would take him to freedom.

When the car drew up friends turned to the veteran. He was cold and inert. The doctor said, when he came, that "Davy's" heart had not been able to bear the strain of his happiness.

WILL TIE KNOT TWICE
FOR KERMIT ROOSEVELT

Madrid, June 6.—Because Ambassador Willard desires to observe all the requirements of the Spanish laws in respect to foreign marriages, the magistrate of the Buenavista district will perform the civil marriage ceremony for Miss Belle Willard and Kermit Roosevelt on June 10 in the magistrate's own residence.

The religious service under Episcopal ritual will take place at noon the next day in the chapel of the British embassy. The chapel is in a pavilion in the embassy grounds.

NEW CRISIS IN MEXICO IS ON

Huerta Orders Blockade
of Tampico.

MEXICAN GUNBOATS TRAILED

By American Warships—Government Set On Keeping
Seaport Open.

ALL LEGATIONS ARE NOTIFIED

Mexico City, June 6.—The Foreign Office sent a note to the legations this afternoon notifying them that the port of Tampico had been blockaded by order of President Huerta.

The United States Government was also notified through the Spanish Minister at Washington.

A New Crisis.

Washington, June 6.—A new crisis in the Mexican situation developed late to-night when two Mexican Federal gunboats closely trailed by two American war craft, the cruiser Tacoma and Gunboat Sacramento, steamed from Puerto Mexico for Tampico to enforce a blockade of that port decreed by Gen. Huerta.

No specific orders have been given, the American commanders merely having instructions to keep the Mexican boats under surveillance, but it is known that Rear Admiral Badger

has been advised that the United States Government regards Tampico

as an open port and desires that

there be no interference with commerce there.

Notice of Gen. Huerta's decree was given formally to Secretary Bryan earlier in the night by Senor Riano, the Spanish Ambassador, who represents the Huerta Government here.

This was followed by a conference of Administration officials, but nothing was known of the result, and even the fact that the notice had been given was not made public.

How far the decision of the Washington Government to see to it that

Tampico is kept an open port will go toward preventing interference with the landing of arms for the Mexican Constitutionalists, no official would

discuss at all. The Cuban steamer Antilla, with a cargo of war munitions, is due at Tampico next Wednesday; the Federal gunboats Bravo and Zaragoza, reported leaving Puerto Mexico to-night by Admiral Badger, should arrive there Monday morning.

The possible effect or suppression of the proposed blockade upon the mediation conference at Niagara Falls has been given due consideration by Administration officials here, and opinion on the subject is said to be sharply divided.

"My orders will be issued to-night," was the only comment of Secretary Daniels. Secretary Bryan

was not awakened to be informed of the departure of the gunboats.

The Mexican vessels carry small guns and are insignificant as fighting ships.

The Tacoma's main battery is of five-inch rifles, and the Sacramento carries four-inch rifles.

No "It's" in Huerta's Promise.

Niagara Falls, Ont., June 6.—No strings are attached to Gen. Huerta's promise to resign the Mexican presidency as soon as his country is "politically pacified." His delegates to the mediation conference took occasion to-day to say publicly that he does not intend to hide behind any technicalities.

In following the newspaper ac-

counts of the conference here the

Mexican delegation reached the con-

clusion that their recent statement

setting forth the attitude of Gen.

Huerta toward demands for his re-

irement had been misinterpreted in

some quarters. It had been said

that under the language of his

pledge to retire when the country

was politically pacified, Gen. Huerta

might insist on holding office until

all guerrilla bands were dispersed.

On that account another statement

was issued to-day by the ranking

members of the Huerta delegation.

It follows:

"Mr. Rabasa, of the Mexican delega-

tion, has been asked what is the

interpretation given by the Mexican

delegates to the word 'politically' in

their statement declaring that Gen.

Huerta is prepared to withdraw pro-

vided that, at the time of his wish-

drawal, Mexico shall be politically

pacified,' and if he thinks that an agreement between the two contending parties would not be considered as fulfilling Gen. Huerta's condition.

"To the above questions Mr. Rabasa answers that the expression used by the delegation does not mean that Gen. Huerta demands the material pacification of the country nor the dispersal of the last of the groups of bandits which overrun many parts of it, making a revolution a pretext for their lawlessness; but that peace shall be assured by political means which will guarantee for the nation that maintenance of law and order which is indispensable to the exercise of constitutional functions. The object in view is peace. The condition is that that object shall have been achieved. If an agreement insures that end the condition is as well fulfilled by it as by any other means."

Mexico City, June 8.—The Mexican Government to-day decided to suspend the effects of the blockade of Tampico, which had been ordered.

This step was taken upon the Government learning that the mediators at Niagara Falls were taking some action in regard to the movements of the steamer Antilla, reported to have sailed from an American port with arms for the Constitutionalists, and also to prevent a set back in the peace negotiations.

It was officially stated that the Mexican Government in ordering the blockade of Tampico had no intention of interfering with commercial traffic. Its intention was only to prevent the Constitutionalists from receiving arms and ammunition.

LITTLE GIRL DROWNS
IN THE REELFOOT LAKE

Hickman, Ky., June 6.—News has been received here of the drowning of Miss Gertrude Powell, the little 8-year-old daughter of Mr. and Mrs. Will Powell, in Reelfoot Lake. She had been in the habit of rowing a boat on the lake whenever she chose, and no danger was feared when she took her small fishing boat and started out. A short while afterward the empty boat was found hanging on a snag, or what is known as "limber-jack." The force of the boat, when it struck this "limber-jack," evidently pitched her out, and, being unable to swim, she drowned. No one was near or saw the tragedy until the empty boat was found. The body was recovered a few hours afterward.

WOMAN PROVES HERO;
RESCUES HUSBAND'S AUTO

Lexington, Ky., June 6.—Mrs. Elizabeth Pharis, wife of Fred Pharis, local representative of the Barber Asphalt and Paving Company, had a thrilling experience during the terrific electrical and rain storm here last night, which puts her in the heroine class. Mr. Pharis' automobile was in the barn, which was struck by lightning. Mrs. Pharis, in her night clothing and unaided rushed from the house with the lightning playing about her and the rain falling in torrents, to the barn 300 feet away, dragged her husband's automobile from the burning building and saved it just in the nick of time. The barn was destroyed by the bolt and Pharis' home damaged.

WHITE MAN CONVICTED
FOR NEGRO'S CRIME

Evansville, Ind., June 6.—Herb Alvis, alias Walter Snider, a negro, arrested in Chicago and brought here to-day, confessed that he and John Hogens, another negro, robbed A. L. Kingsbury, a business man in this city in June last, and for this crime Cartis Smith, a white man, was convicted and is now at the State Reformatory at Jeffersonville, Ind., serving a sentence of from five to fourteen years. Judge Duncan Givens, of the Circuit Court, will notify Gov. Ralston at Indianapolis at once and ask that Smith be released from prison.

DAMAGE TO BERRY CROP
AMOUNTS TO \$50,000

Bowling Green, Ky., June 8.—The proceeds from the Warren county strawberry crop this year will not exceed \$60,000, which is about half the amount realized by the growers of the county last year, according to General Manager Hubert B. Graham, of the Warren County Strawberry Growers' Association. The long drought played havoc with the crop this year.

drinking would be done on Saturday nights. It finally led to his ruin.

Charlie Clary went into the McAtee, Lyddane and Ray store when he was a small boy over 12 years ago. He showed at once that he had talent for window decorating, and worked himself up as a valuable employee of the firm. He was given every opportunity to make good, and on account of his qualifications and competency, he was also placed in charge of the reserve stock department of the firm. He had the admiration and respect of all the employees of the firm, and when it leaked out that he had been arrested, many were shocked and could not believe that such a thing was possible.

FORMER OHIO COUNTY
MEN HIGHLY HONORED

Sturgis, Ky., June 6.—Mr. C. H. Ellis was elected president of group two of the Kentucky Bankers' Association, convening at Dawson Springs the first of the week; Mr. T. R. Barnard, of Island, Ky., secretary, and J. K. Waller, of Morganfield, and Mr. B. G. Witt, of Henderson, executive committee.

Prof. C. C. Justus, who has had charge of the Ballard County High School, at La Center, the past four years, was elected by our board as superintendent of the Sturgis school.

The board and all who met Mr. Justus, have been very much pleased with him and from his personality

and recommendations, we think he is the right man in the right place, and will be in executive ability true to his name.

FAIR AND WARM WEATHER
THIS WEEK'S PREDICTION

Washington, June 7.—Generally fair and hot weather is forecast for the coming week east of the Rockies.

"There are no present indications of precipitation of consequence east of the Rocky Mountains during the coming week," said the Weather Bureau's bulletin to-night, "except that there will be showers and thunderstorms at the outset from the Lake region eastward and possibly in the far Northwest. Occasional local thunder showers are also probable in the South, including Texas, but no general rains. West of the Rocky Mountains rains will continue early in the week, followed by generally fair and warmer weather from the middle until the close of the week, the rising temperatures extending to the eastern slope of the mountains."

"It will be somewhat cooler Monday and Tuesday over the upper Valley and the central portion of the country, with moderate temperatures thereafter, while in the East rather high temperatures will rule during much of the week, owing to the presence of a strong high pressure area, over the South Atlantic States and the adjacent ocean."

WOODEN LEG PREVENTED
WOMAN FROM SINKING

Evansville, Ind., June 6.—Mrs. Rose Neal, thirty years old, tried to kill herself this afternoon by jumping into the Ohio river. The woman has a wooden leg and this prevented her sinking. Three men on the bank saw the woman floating in the river and securing a skiff rescued her. Ten days ago Mrs. Neal attempted suicide by jumping into the river at Henderson, Ky., and her wooden leg at that time prevented her sinking. Mrs. Neal says the wooden leg is her "hoodoo."

NEW \$100,000 HOTEL FOR
M. STERLING PLANNED

Mt. Sterling, Ky., June 8.—Judge H. Clay McKee, of this city, has just been granted a permit for the erection here of a modern hotel, 120x70 feet, which will be located on Bank and Locust streets. The building will be five stories high, of brick, stone and steel, and will contain storerooms underneath, with office.

The building will cost approximately \$100,000 and will be one of the handsomest in the State.

Clary was confronted with evidence of his conduct, and he admitted that all

BODIES OF DEAD OF SUNKEN SHIP

**Were Ruthlessly Robbed
Of Valuables.**

RINGS TORN FROM HANDS

**Of Women—One Ghoulish
Thief Caught With
"Goods" On Him.**

ALL REGISTERED MAIL LOST

Montreal, June 4.—Many bodies of victims of the Empress of Ireland ocean disaster have been robed of money, checks, diamonds and clothing.

This was learned when relatives of the dead made reports.

It is estimated that the property stolen represents a fortune.

Rings were torn from the hands of women. Fingers on which the rings were worn are in many instances lacerated, indicating the reuse by the ghouls.

When Lionel Kent, wealthy Montreal man, jumped into the icy waters of the St. Lawrence a moment before the Empress of Ireland took her fatal plunge, he had in his pocket \$1,000 in travelers' checks. He was rescued and taken aboard the Storstad. When he landed in Quebec he was surprised to find himself penniless. No one was more astonished than Mr. Kent when he received a message to-day from a detective of the arrest of a sailor on the charge that he had stolen and cashed one of the checks.

The prisoner, Menuel Chude, a Honolulu fireman, was captured in the Merchants Bank, trying to cash a check for \$500.

Complete official figures given out were to-night by the Canadian Pacific show that when the Empress of Ireland sank she carried 1,024 persons to their death. Her total number of passengers was 1,476, and of these 452 were saved. Of the rescued 36 were first-class, 47 second-class, 136 third-class and 233 officers and crew. Of the missing 56 were first-class, 209 second-class, 352 third-class and 180 of the crew. The identified dead 22 were first-class, 31 second-class and 12 officers and crew.

The collier Storstad, which rammed the Empress of Ireland, causing a loss of more than 1,000 lives, completed unloading her cargo of coal to-day, and it was possible to make a thorough inspection of her bow, shattered by the shock of the collision.

It was seen that her stem was twisted so much to starboard that it almost formed a half circle. Some of the lowermost plates in her bow also were twisted to starboard and torn away. There is a large indentation on either side of the stem and the rivets are torn clear.

The condition of the Storstad's stem is pointed to in connection with Captain Andersen's claim that, when the collision with the Empress of Ireland occurred, it was impossible for the collier's stem to remain in the hole because it was twisted by the forward movement of the Empress.

The Storstad is still in the possession of a bailiff, who seized the vessel on the Canadian Pacific Company's claim of \$2,000,000 loss against the collier.

The Canadian Pacific Railway officially stated to-night that the funeral of the members of the crew of the Empress of Ireland who lost their lives, and whose bodies have not been claimed, will take place at Quebec. The Canadian Pacific will bear the expense.

According to the statement of Montreal Postoffice officials, the heavy registered mail, amounting to 1,903 packages, which went down on the Empress, is a total loss, and there will be no compensation for the senders or addressees of those packages.

The postal regulations provide that the department is only responsible for registered mail actually lost in the mail, and then only to the extent of \$25 for each package.

The Empress of Ireland carried

158 bags of newspapers, 51 bags of letters, 8 baskets containing 301 parcels, and 1,903 registered articles.

Those who sent money-orders to Europe which were lost on the Empress, however, will not be out of pocket, as duplicates of the money orders held in Ottawa will be copied and dispatched to London. The parties concerned will be paid the money at their nearest post-office. It is estimated that over \$140,000 in money-orders went down in the mail bags.

THAW'S CASE FINALLY REACHES HIGHER COURT

Washington, June 4.—Harry Thaw's fight against being returned to Matteawan asylum reached the Supreme Court to-day on appeal from a decision of Judge Aldrich, of the New Hampshire Federal Court, against Thaw's extradition on the ground of the demand of the New York State officials. As soon as the case is formally docketed, probably this week, it is believed an application will be made for Thaw's release on bail while the case is pending before the Supreme Court. In the ordinary course the case would not be decided for nearly two years.

"LEPER" EARLY CAUSED WILD PANIC AT HOTEL

**Where Vice President and Other
Notables Live—He Recently Escaped.**

Washington, June 4.—Consternation ran wild in the Shoreham Hotel, where Vice President and Mrs. Marshall and other notables live, when it was noted John Early, escaped leper, had been living there several days.

Early registered at the hotel Sunday afternoon under the name of E. J. Weston, of New York, and has since been mingling freely with the guests, walking about the Washington streets, attending moving-picture shows and enjoying the sights of the city.

Tiring of the uneventful visit, however, he telephoned the Health Officers this morning of his presence, and they arrested him in his hotel room and hustled him to his former isolation quarters in Anacostia. He now is occupying the same brick brick built for him six years ago.

From Early's own account of his wanderings since he took French leave of the Public Health Station at Port Townsend, Wash., May 15, he arrived in New York May 23, and remained until last Sunday, when he left for Washington.

Arriving at the Washington Union Station, he took a taxicab and drove to the hotel, where he registered, and was shown to his room without question.

It is said by the health officials, who are familiar with his case, that the ravages of leprosy have made great inroads on him since his incarceration in Washington.

While formerly Early always denied vehemently that he was a leper, he now freely admits a belief that he has the disease or something similar to it. His chief purpose appears to be to stir agitation about his case and bring about the establishment of a national leprosarium, where unfortunate may be taken care of by the Government.

The future of Early in Washington is a matter of much concern to the authorities. He will be kept isolated until final disposition of his case is made.

Chamberlain's Colic, Cholera and Diarrhoea Remedy.

Every family without exception should keep this preparation at hand during the hot weather of the summer months. Chamberlain's Colic, Cholera and Diarrhoea Remedy is worth many times its cost when needed and is almost certain to be needed before the summer is over. It has no superior for the purposes for which it is intended. Buy it now. For sale by all dealers.

LARGE SUM IS REALIZED FROM SALE OF LETTUCE

Paducah, Ky., June 5.—By actual figures growers here have shown that every acre of lettuce in the county association brought in \$2,000 this year. The growers averaged 105,600 plants to the acre and the plants weigh half a pound on an average. The lettuce brought five and six cents per pound and the growers base their profits on an eighty per cent yield, which is conservative.

The lettuce was sold in Detroit.

Parental Anxiety.

"Did anybody ever ask you to marry, Aunt Susie?"

"Yes, dear."

"Was it you lover?"

"No, dear. It was my father."

Taking No Chances.

At least one Christian county farmer is not going to take chances on dry weather preventing him from putting out a tobacco crop. This

INGENIOUS COAL MINING MACHINE

**Will Take the Place of
Many Men.**

AND SAVE FIFTY PER CENT

**In Cost of Coal Production
—Digs and Loads Coal
At Same Time.**

EVIDENTLY GREAT INVENTION

Has a new epoch come to the coal-mining industry? This was the question in the minds of numerous coal operators and others interested in coal mining as a day or two since they watched the operation of the first practical coal-mining machine—machine that has stood the test of months, being quietly operated in one of the larger mines of the Pittsburgh district, turning out thousands of tons of commercial coal direct from the face of the coal seam, placing the coal in pit cars and keeping men on the jump to get the loaded cars out of the way when loaded.

For years such a machine has been the dream of coal-mining companies. It has been needed to solve the increasing problem of coal mining—such as mine disasters, increasing cost of labor, the growing expenditures for mine equipment, miners' homes at the mines, and countless other outlays of which the average citizen has little realization. The new mining machine is the development of entirely new principles in mechanical mining. It is the product of H. A. Kuhn, of Pittsburgh, one of the foremost mining and mechanical engineers of the Pittsburgh district, who has spent more than 10 years in close application to the task which he has at last completed, and in the perfection of which he has expended a fortune in development work. In the early years of his experiments he spent his time discovering fundamentals. He sought a principle upon which a machine would work. He made this a success, and from it built an economical, practical, cheap and "fool-proof" machine that does all the work of the human miner—only it does this 20 times as fast and 50 per cent cheaper.

As the machine stands, it is a structural steel frame, oblong in form, which rests on a steering truck which rides on the floor of the mine. It carries motors for operating the cutting tools and the tools themselves, and it attacks the coal seams in any position, moving up and down, sidewise or in any direction the coal seam leads. It also removes the roof slate when necessary.

Electricity or compressed air can be used in operating the motors, and so little power is required that the cost for this item alone is less than one cent per ton of coal mined. One peculiar feature of the machine that impressed the spectator is that it seems to be fully as flexible as the human coal miner. It is estimated that the machine will cut the cost of coal mining in half.

From the time the machine takes the coal from the seam, cuts it, places it on a conveyor and loads it in a pit car, no human hand touches it. With 20 ordinary laborers 10 of the machines will produce 1,000 tons of coal a day, as but two men are needed to operate a machine. More than this, the machine cuts the coal cleanly from the roof to the floor of the mine, leaving both as even as a billiard table, and it takes out in excess of 90 per cent of the coal in the ground, while the best practice of to-day seldom goes better than 70 per cent of the coal, the rest being lost because of the too great effort to extract it.

Mr. Kuhn takes exception to the idea that any miners will be thrown out of, or rather left without, employment by the introduction of the machines. He says that 40,000 additional miners are required each year in the United States to keep pace with the growing demand for coal, due to the increase in population, while 20,000 miners, it is estimated, leave the mines annually for other occupations, thus making a demand for about 60,000 new miners each year. It is becoming more and more difficult each year to obtain the increased mine labor required. The inventor believes that his machine will replace this labor, but only in the way of reducing the number of new men called upon to enter the mines each year.—Pittsburgh Cor. New York Herald.

It is estimated that the machine will cut the cost of coal mining in half.

From the time the machine takes

the coal from the seam, cuts it, places it on a conveyor and loads it in a pit car, no human hand touches it. With 20 ordinary laborers 10 of the machines will produce 1,000 tons of coal a day, as but two men are needed to operate a machine. More than this, the machine cuts the coal cleanly from the roof to the floor of the mine, leaving both as even as a billiard table, and it takes out in excess of 90 per cent of the coal in the ground, while the best practice of to-day seldom goes better than 70 per cent of the coal, the rest being lost because of the too great effort to extract it.

Mr. Kuhn takes exception to the idea that any miners will be thrown out of, or rather left without, employment by the introduction of the machines. He says that 40,000 additional miners are required each year in the United States to keep pace with the growing demand for coal, due to the increase in population, while 20,000 miners, it is estimated, leave the mines annually for other occupations, thus making a demand for about 60,000 new miners each year. It is becoming more and more difficult each year to obtain the increased mine labor required. The inventor believes that his machine will replace this labor, but only in the way of reducing the number of new men called upon to enter the mines each year.—Pittsburgh Cor. New York Herald.

As the machine stands, it is a structural steel frame, oblong in form, which rests on a steering truck which rides on the floor of the mine. It carries motors for operating the cutting tools and the tools themselves, and it attacks the coal seams in any position, moving up and down, sidewise or in any direction the coal seam leads. It also removes the roof slate when necessary.

Electricity or compressed air can be used in operating the motors, and so little power is required that the cost for this item alone is less than one cent per ton of coal mined. One peculiar feature of the machine that impressed the spectator is that it seems to be fully as flexible as the human coal miner. It is estimated that the machine will cut the cost of coal mining in half.

HARD QUESTIONS WERE ANSWERED

By Thirteen-Year-Old Evanston Lass.

WHICH PUZZLED HER ELDERS

Look Easy, But Where In Old Testament Do You Find Them?

MAYBE THEY ARE NEW TO YOU

Evanston, Ill., June 5.—Dozens of Evanston family Bibles have been dragged forth by persons attempting to equal the feat of thirteen-year-old Catherine McCullough, daughter of Mrs. Catherine Waugh McCullough, of this city, in answering correctly twenty-six questions in the Old Testament. The questions were submitted as a test in the First Congregational Sunday-School of Evanston.

Many students of the Bible pronounced them easy at first glance, but later admitted they were "stumped." Others said the questions were "trivial" and "meaningless." Prof. Frederick Oxtoby, of the Chicago Theological Seminary, took the trouble to wade through the list and succeeded in supplying the answers, but was compelled to refer to his concordance repeatedly to obtain the correct spelling of the proper names.

The questions and answers as by Prof. Oxtoby are:

Q.—What man threw stones at a king? A.—Shimelel, at David.

Q.—Who was the counselor who hanged himself when his advice was not followed? A.—Abithophel.

Q.—What perfume meant the excommunication of any one who made it for personal use? A.—Incense.

Q.—What was the origin of the word "Shibboleth"? A.—Those who pronounced it "sibboleth" were destroyed.

Q.—Who rescued a king in battle from a giant? A.—David.

Q.—When did the bleating of sheep foretell the loss of a kingdom? A.—That's the story of Agag and Samuel.

Q.—What hero saw fire come out of a rock as a sign of his leadership? A.—Gideon.

Q.—Who was the only woman judge over Israel? A.—Deborah.

Q.—What great leader nearly lost his life because of his fondness for honey? A.—Jonathan.

Q.—What hero, when eighty-five years old, conquered three tribes of giants and won an inheritance? A.—Caleb.

Q.—What childless prince sought to be remembered by a pillar? A.—Absalom.

Q.—Who said that a man would give all he had for his life? A.—Satan, in the book of Job.

Q.—What tyrant kept seventy mutilated kings under his table and what happened to him? A.—Adonai Bezek. He was put to death. I think his toes were cut off, but I won't say that.

Q.—Whose bones were carried forty years by a great nation? A.—Joseph's.

Q.—What fierce nations were driven out of their cities by hornets? A.—The Canaanites.

Q.—What prophet learned a lesson from a worm? A.—Jonah.

Q.—What was the name of Da-

YOU CAN'T EAT APPETITE POOR

Multitudes of people lose their appetite. Simply don't care for anything to eat. The dinner bell has no interest to them. They loseth their breakfast. They may nibble a little of this and a little of that, but they do not care for it.

Lunch has lost all of its charms, although they try to eat something.

Dinner about the same.

There is something positively wrong, of course, but no disease that can be named. Just out of sorts. That is all.

It is in this kind of a condition that Peruna acts very beneficially.

After using Peruna, interest in food is revived. Beginning with a teaspoonful of Peruna before each meal will generally quickly improve the appetite and help the digestion.

Thousands of people can testify to this. Liberated from a slavery that is almost unbearable. The slavery of having no interest in life. All used up. Yet one does not know exactly why. Take Peruna before each meal. Fields will get blue again. Fields will look green once more and life will be pleasant. You will feel that you are good for something and the world is a good place to live in. Peruna will do it. Not as an artificial stimulant. Simply a tonic that stimulates appetite in a natural way.

Those who object to liquid medicines can now obtain Peruna Tablets.

vid's great-grandmother? A.—Ruth.

Q.—Who was the first musician? A.—Jubal.

Q.—Who was it made the morning stars sing together and the sons of God shout for joy? A.—Jehovah.

Q.—What giant king had an iron bedstead thirteen feet long and six feet wide? A.—Og.

Q.—What happened in the valley of bones? A.—The bones came together and came to life.

Q.—What king used his penknife to cut a scroll in pieces and then burned it in the fire? A.—Jehoahkim.

Q.—What young man lost his temper in an argument with four older friends? A.—Job.

Q.—What great hero prayed to God to blot him out of the Book of Life to atone for his people? A.—Moses.

Q.—What great family lost two of their number by fire, but were not allowed to mourn their loss? A.—The family of Aaron. The two brothers were Nadab and Abihu.

Q.—Who escaped by the skin of his teeth? A.—Job.

MODERN DANCING AS MEASURED BY THE MILE

Boston, June 6.—A scientific Harvard student has measured the hard work in modern dances. He went to a dance and carried along two pedometers, one that he attached to his leg when executing the tango and the other when dancing the hesitation.

In dancing the tango five times, with encores, he covered four and a quarter miles. That makes an average of more than four-fifths of a mile a dance. The hesitation, which was sandwiched in between the maxixe and tango, served as a rest cure, for in four hesitation waltzes the pedometer recorded only a little more than a half mile, or one-eighth of a mile a dance.

During the evening, which includes about 20 dances, there are usually half that number of tangos, five or six hesitations and the rest maxixes. A dancing pair therefore travels, roughly, over twelve miles during the evening.

In the course of a single maxixe the masculine partner supports three-quarters of the bodily weight of his partner about 25 times, and, making the average weight of the girl 100 pounds, it is easy to calculate that the man lifts near 2,000 pounds or a whole ton during the course of each maxixe dance.

Coughs and Colds Weaken the System.

Continued Coughs, Colds and Bronchial troubles are depressing and weaken the system. Loss of weight and appetite generally follow. Get a 50c. bottle of Dr. King's New Discovery to-day. It will stop your cough. The first dose helps. The best medicine for stubborn coughs, colds and all throat and lung troubles. Mr. O. H. Brown, Muscatine, Ala., writes: "My wife was sick during the hot summer months and I honestly believe Dr. King's New Discovery saved her life." Good for children. 50c and \$1.00 at your druggist. HE MISSED IT SOME, BUT ALL MAKE MISTAKES

Over in Taylorsville a citizen who recently wrote a piece for the village paper told about a large fish having been caught in a creek and announced that it was to be sent to "a chipropodist" to be mounted. In a second letter to the paper he apologized by saying he is no encyclopedist; that he guessed at a word and missed and furthermore he thought it the business of the proofreader to correct mistakes. In this instance the proofreader was no encyclopedia, either, and the compositor evidently was one of those conscientious printorial guys who follow copy, even when it blows out at the window. Besides, it's all the average newspaper man can do to correct his own mistakes without revising the fish stories and the parts of speech of the rural correspondent.

In this case, too, the woman was charged with attempted manslaughter, which involves a much lighter penalty than attempted murder. It was proved at her trial that she had told her servant girl that she intended to shoot the man, and that no woman is punished any more in Berlin for killing a recalcitrant lover.

She had also written in a similar vein to relatives and friends, and, after shooting, she boasted to her servant that she had sent four bullets into her victim.

The jury acquitted her, and the spectators in the courtroom applauded so long and so loudly that the Judge ordered the room cleared and threatened fines for contempt of court.

The Kruezeitung, fairly representing the views of the entire press, comments:

"It is utterly past understanding how such a person could win such sympathy that her acquittal should be greeted with frenetic applause." It is perfectly plain that such verdicts, which we have seen repeatedly in the recent past, signify a danger to the security of the empire."

In administering the oath to a jury which began work this week, a Berlin Judge referred to the recent crimes by women, and warned the jurors against permitting sympathy in such cases to warp their judgment.

Notwithstanding the great increase of the army and the enormous military taxation voted by the Reichstag only last year, the German Defense Society is not yet satisfied that enough has been done to protect the empire from its foes. At its annual meeting, just held at Posen, resolutions were adopted, calling for universal military service, and pointing to the fact that even after the increased recruitment of October, 1913, as provided for by the new law, there was a surplus of 38,000 able-bodied young men left over. The society also calls for a systematic preparation of boys for Military duty, and such changes in the system of one-year volunteer

PASSION PROMPTS BERLIN MURDERS

German Women Follow a French Custom.

PUT UNFAITHFUL OUT OF WAY

Much Indignation Is Aroused Over the Light Sentences Imposed.

'CRIMES OF PASSION' GALORE

Berlin, June 6.—Berlin appears to have imported for itself what the French have called "crimes of passion," and to have extended their range far beyond the French example. A series of recent murders and attempted murders of men by women have been so lightly punished that the entire Berlin press is criticizing criminal authorities and juries severely.

A conspicuous case of some months ago aroused the press to protest. A young woman, informed by her lover that he did not care for her any more, invited him to a farewell walk in the Tiergarten and shot him in the back of the head, killing him instantly. She was brought to trial not on a charge of murder, but of manslaughter, and the public prosecutor admitted the existence of the mitigating circumstances, which under a paragraph of the penal code are present, "when the defendant at the time of the commission of the action was in such a condition that he did not realize what he was doing, or suffering under a pathologic disturbance of the senses through which his power of decision was made impossible."

This condition, the State admitted, was present, due to the young woman's anger at being deserted. The sentence was for a year and a half to the penitentiary.

The most striking of the whole series of "crimes of passion" was the most recent. The woman in the case lived in an aristocratic quarter of Greater Berlin, in apartments paid for by an admirer. The man began to show a coolness toward her, and finally informed her that he intended to sever relations with her. She demanded the payment of a considerable sum, which was refused. Thereupon, she invited him to a restaurant for a farewell supper. In a corner of the room, behind a screen, she drew a revolver from her muff and shot him four times. He was in a hospital for weeks, and still carries one bullet in his body.

In this case, too, the woman was charged with attempted manslaughter, which involves a much lighter penalty than attempted murder. It was proved at her trial that she had told her servant girl that she intended to shoot the man, and that no woman is punished any more in Berlin for killing a recalcitrant lover.

She had also written in a similar vein to relatives and friends, and, after shooting, she boasted to her servant that she had sent four bullets into her victim.

The jury acquitted her, and the spectators in the courtroom applauded so long and so loudly that the Judge ordered the room cleared and threatened fines for contempt of court.

ANNOUNCEMENTS.

For Congress.

We are authorized to announce
HON. BEN JOHNSON,

Of Bardstown, for re-election to Congress from the Fourth Congressional District of Kentucky, subject to the action of the Democratic party. Primary, August 1, 1914.

We are authorized to announce
MR. JOHN W. BOYD,

Of Elizabethtown, for election to Congress from the Fourth Congressional District of Kentucky, subject to the action of the Democratic party. Primary, August 1, 1914.

Teddy went over and "discovered" Spain last week.

Wonder why Gen. Coxey and his army didn't think to march towards the Kansas harvest fields instead of towards Washington?

Billy Sunday has consented to come to Louisville. Thirty thousand dollars is set as the sum the meeting will cost the Falls City.

Col. Roosevelt may have as much trouble mapping out the political situation in the U. S. as he did in revising the course of the Amazon.

The school curriculums nowadays make it so that a lot of young men put in much time studying books which they will soon forget when they commence trying to make a living.

Col. Mayo's wealth was first estimated by newspaper reporters at twenty millions, but now it has dwindled down to a meager million. As a matter of fact, his estate is of such character that it is hard to figure it out in dollars.

The two wings of the erstwhile Republican party are now trying their best to get the other side to "come back." But if real political principles mean anything, they will have a hard time accomplishing this result.

It is said that a new coal mining machine has been invented and put in practice by a man in Pittsburgh which will do the work of 20 miners at a saving in cost of production of 50 per cent. It is feared by some that this machine, if put into general use, will throw many miners out of employment and put consternation in their ranks. It was the same way with the linotype machine when it was first put out, but it has proven a great blessing for printers and is strongly upheld in union circles. The coal mining machine will probably produce similar results.

"OUT OF THE MOUTHS OF BABES."

It is an old and trite saying that out of the mouths of babes shall wisdom come. A gold medal prize was offered last year by Logan Waller Page, Director of the U. S. Office of Public Roads, for any little boy or girl who would write, unassisted, the best essay on the repair and maintenance of dirt roads. Really, several awards were offered, but the capital prize was won by little Miss Amy Coon, of Scammon, Kansas, a 14-year-old pupil of the Skidmore School. This little "lil" of a girl handled her subject like a veteran philosopher or road-maker. Her remarks are worthy an older head.

Mrs. Amy says that the chief reason why earth roads have received no attention and little improvement in the last 40 years is because they have not had sufficient place in the public mind. That is, the road matter has not been given the attention which its importance warrants. This is really the key-note of our road system. It's this woful lack of interest which has brought the public thoroughfare to its present deplorable condition. Continuing on her subject and writing like a sage of three her age, this little girl very pertinently says:

"People seldom give the improvement of roads any thought beyond paying their taxes or working them and sometimes getting out of it altogether. They then find fault with the road overseer."

"Straight roads are desirable, but in hilly countries it is often necessary to make a winding road in order to have a level grade."

"After the road is properly located the next thing to be thought of is the drainage. A poorly drained road is very undesirable when after a rain or snow, the horses' feet and

wagon wheels cut it up; then it becomes impassable with mud, and then a freeze comes which leaves the road in a worse state than before."

"When the water is allowed to course down the middle of the road it washes out gutters and ruts that are quickly enlarged by the wagon wheels. This can easily be overcome by proper drainage."

PIFFLE AND GRAPE JUICE ARE PUT ON RETIRED LIST

Vera Cruz, Mexico, June 8.—The good ships Piffle and Grape Juice were retired from the Atlantic Fleet by Rear Admiral Badger.

When the navy captured Vera Cruz two small tugs were seized as part of the harbor equipment. The sailors christened them Piffle and Grape Juice as a joke on Secretaries Daniel and Bryan, and the names stuck to the craft.

When hailed by officers of the deck on other ships with "What ship is that?" the crews would give the burlesque names, replying "The Tug Piffle," or "The Tug Grape Juice."

The names even began to appear on the logs of various ships.

DRILLING FOR OIL IS TO START IMMEDIATELY

Hartford Man Starts Things Going in Lincoln County—Bright Outlook.

The Stanford Interior Journal of Friday says:

Drilling for oil on an extensive and systematic scale will start in Lincoln county early next week.

W. Barnard, of Hartford, Ohio county, a successful oil operator of western Kentucky, has been in this section since early in January, working out the structural work and geology of an anticline in the western part of this city, on the farm of Adam W. Carpenter. This week he mounts in a standard rig and string of tools and drilling will start within the next few days. Harry A. Mohr, recently of Wayne county oil fields, is doing the contract work.

Mr. Barnard, who is a thoroughly experienced and successful oil man, thinks highly of the prospects of locating a large pool underlying Lincoln county. He says that the preliminary structure work shows a very pronounced arch of a fold similar to the famous Glenn pool in Oklahoma and other pools of that State, Illinois, Ohio, Pennsylvania and other oil fields, which have proven very large producers. He has figured the anticline here to be about one and a half to two miles in width and nine to ten miles long, which will cover a considerable territory in the western part of Lincoln county. The general trend of the axis of this anticline is said to be about 45 degrees northeast and southwest.

Mayor A. B. Florence, of Stanford, who has had much experience in this work in the Wayne county fields, is assisting Mr. Barnard. Great interest is being manifested here over the prospects of getting a gusher and opening up a big field in this county. Citizens are giving Mr. Barnard and his men every encouragement and every facility at their command, for all realize what it will mean to this county to have a rich oil field in its midst. With the L. & N. and Cincinnati Southern railroads both running through the indicated field, and with the pipe line from Wayne county only about 5 miles away, a pool located here would be in a most advantageous position and prove the means of bringing a large amount of business to this community.

Fordsville Defeats Trisler.

In one of the hottest games in many days Fordsville defeated the Trisler team by the narrow score of 1 to 0 last Saturday. The Trisler team was made up of such stars as Free, Hender, Whittinghill, Etc. Whittinghill did some pitching to hold Fordsville down to one run. G. Wells the clever hard-hitting 2d baseman, worked on the mound for Fordsville the 1st half and succeeded in getting away without being in danger of being scored on. Then came Owen the Smoky Boy, who taught them a lesson in speedy pitching. Bivins, the great portside worker, worked one inning and was his old self sending the only three men that faced him down by the strikeout route. Owen, Yates and Bivins were the sluggers of the game.

DUTY OF U. S. IS TO SERVE WORLD,

Says President Wilson In Speech To Middies.

PRESENT MISSION IN MEXICO

One Of Service To Humanity—Our Aim Higher Than Mere Fighting.

HIGH TYPE OF NATIONAL AIM

Annapolis, Md., June 5.—President Wilson to-day told 154 graduates of the Naval Academy, many of whom leave shortly for Mexican waters, that the mission of the United States is one of service to humanity, not of aggrandizement nor conquest. He spoke at the annual academy graduation exercises and later delivered the diplomas to the young midshipmen. He declared the duty of the United States is to serve the world.

Speaking of the Vera Cruz situation, the President reverently declared that, "I pray God the boys there will not have to fight any more." He added that the real good they will do will be their impression on the Mexicans.

"They are not strutting and blustering," he went on. "The people of Vera Cruz who despised and hated Americans will think differently of them when our boys leave."

The President spoke in a huge armory packed with more than 5,000 officers, midshipmen and relatives and friends of the graduates. He was enthusiastically cheered during his address.

President Wilson said in part:

"It ought to be one of your thoughts all the time, that you are sample Americans; not merely sample soldiers, but sample Americans, and that you have the point of view of America with regard to her navy and her army, that she is using them as the instruments of civilization, not as the instruments of aggression.

"The idea of America is to serve humanity, and every time you let the Stars and Stripes free to the wind you ought to realize that that is in itself a measure, that you are on an errand which other nations have sometimes forgotten; not an errand of conquest, but an errand of service.

"What do you think is the lasting impression that those boys down at Vera Cruz are going to leave? They have had to use some force. I pray God it may not be necessary for them to use any more, but do you think that the way they fought is going to be the most lasting impression? Have men not fought ever since the world began? Is there anything new in using force? The new things in the world are the things that show the moral compulsions of the human conscience, those are the things by which we have been building up civilization, not by force, and the lasting impression that those boys are to leave will be that they exercised self-control.

"You must bear in mind that you are the champions of what is right and fair all around for the public welfare no matter where you are, and that you are ready to fight not merely at the drop of a hat or upon some slight punctilio, but that you are champions of your fellow men."

The President praised Admiral Fletcher, saying he had been on duty longer at Vera Cruz than the other commanders and that he had the qualities of a statesman.

Sore Nipples.

Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the baby to nurse. Many trained nurses use this salve with best results. For sale by all dealers.

Kentucky Trust Laws Invalid.

Washington, June 8.—The anti-trust laws of Kentucky are unconstitutional because of their "vagueness." Such was the gist of a decision handed down to-day by the Supreme Court of the United States in the appeal of the International Harvester Company from conviction in five Kentucky cases in which it had been fined an aggregate of \$10,000. The opinion was written by Justice Holmes, and received the concurrence of six other members, Justices McKenna and Pitney dissenting.

Emphasis was laid by Justice Holmes on the fact that the present decision was in no wise in conflict with other decisions in "trust cases," and was based solely on the provis-

ions of the statutes of Kentucky. To compel a corporation to live up to the fine distinctions of the Kentucky law, said the decision in effect, would be "to exact gifts that mankind does not possess."

Beyond its effect in the cases in question, however, the decision may be taken to indicate the Supreme Court's determination that the anti-trust statutes of the various States must be specific and not liable to misconception in construction. There can be no discrimination between "good" trusts and "bad" trusts, and the States must draft their laws with the same exactness that they demand from corporations in their observance of the statutes.

FILES SUIT FOR \$21,000 OF ALLEGED RENT MONEY

Myasville, Ky., June 8.—Elizabeth Kirk has filed suit in the Marion Circuit Court against E. T. Kirk as executrix of Morris C. Kirk for \$21,000. She claims it is due her for rent on portions of land and wishes to be adjudged the owner and be entitled to possession of these lands.

MUCH DAMAGE FROM A STORM AT EVANSVILLE

Wind Blows Gale Of 30 Miles Hour—Railroad Loss

\$30,000.

Evansville, Ind., June 6.—A storm which struck Evansville early last night wrecked several buildings, entailing property loss that will amount to many thousand dollars. The wind attained a velocity of more than 30 miles an hour.

The main office building of the Illinois Central Railroad Company, on outer Franklin street and other buildings in the neighborhood were damaged. The loss to the railroad company was placed at \$25,000. The First Avenue Presbyterian church, the manse next door and another residence were wrecked. The church, the parsonage, will be a total loss, it is stated. They were valued at about \$20,000 and were insured.

The storm extended many miles south of here into Kentucky, where many houses are reported to have been blown over by the wind. Seidel's greenhouse in this city was destroyed. Several fires were started by lightning. The wind blew many trees across the traction lines entering the city.

A large beam 15 feet long and a foot wide was blown completely through the residence of Norman Ennis, and barely missed members of the family who were at supper.

J. P. Mannion, an Illinois Central Railroad telegraph operator, was at his desk sending a message when the storm unroofed the building. He was struck on the head by falling slate, and badly bruised.

A large plate glass was blown out of the front of a saloon on First avenue and Mrs. Frank Lorenzo and three men who had taken refuge under the porch were cut by falling glass. Mrs. Lorenzo was injured on the head and body.

JOLLY IS CANDIDATE FOR U. S. SENATOR

Frankfort, Ky., June 8.—George W. Jolly, of Owensboro, sent his petition to Assistant Secretary of State C. H. Vansant to-day to get his name on the August primary ballot as candidate for the Progressive nomination for United States Senator. The petition was not properly drawn and was sent back to him.

The petition of Rollin Hurt, of Columbia, candidate for the Democratic nomination for Appellate Judge of the Third district, was filed to-day.

B. P. Rock Eggs AT REDUCED PRICES FROM NO-CREEK POULTRY FARM

As we now have all the chicks needed this season we will sell for the next 30 or 40 days, eggs from our very best yards at \$1.00 per 15 eggs. Satisfaction guaranteed.

The stork visited Mr. and Mrs. Ellis Foster, city, last Wednesday morning and brought them a fine ten-pound boy. The little fellow has been named Ellis Maddox Foster, in honor of both his parents.

If you are in the market for a buggy, from the cheapest to the best grade, call on Cooper & Co., Hartford, who will make you special prices. Get their prices before purchasing elsewhere.

The Rice Bros. show folks had a young sea-lion with their outfit here Saturday, but thought best not to take it further during the hot weather. They left it with Dr. Ford, who is taking splendid care of it.

The thermometer reached 110 degrees in Hartford yesterday and unless we soon have rain the vegetation in Hartford and vicinity will be parched. Some grass plots in the town would burn over now if fired.

Dr. C. W. Felix, formerly of Olinton has located at Nelson, Muhlenberg county, for the practice of his profession, which includes the practice for the miners at this point. He succeeds Dr. J. A. Duff, who has not yet decided where he will locate.

Messrs. R. B. Thomson, Horton; Dr. J. A. Duff, Nelson; H. W. Ralph, Hartford, Route 6; T. F. Tanner, Hartford, Route 7; James H. Ambrose, Hartford, Route 5, and C. B. B. Felix, Barrett's Ferry, were among the Herald's callers Monday.

The Rice Bros. wagon show gave a performance here Saturday night. Financial difficulties prevented them from getting away early Sunday morning as intended, but a subscription paper was started around and charitably inclined persons "chipped in" and they finally left.

FOR SALE—House and lot and blacksmith shop. Good stock, new tools. Also one 10 h. p. gasoline engine in good condition. Will sell part or all at a most reasonable price. For further particulars call 204 J. T. LOWE, (Both Phones) Sunnydale, Ky.

Jognah Amerine, of Richmond, Ky., who had been on an extended visit to her son and daughter, Mr. and Mrs. W. H. Riley, has returned home. She was accompanied home by her daughter, Mrs. J. C. Payne, of Wimanna, Fla., who had likewise been visiting Mr. and Mrs. Riley.

Mr. McHenry Holbrook, who recently graduated from the Kentucky State University, Lexington, taking B. A. degree, arrived home Friday. He was accompanied by his sister, Miss Mariam Holbrook, who has been attending the Science Hill College for Young Ladies, at Shelbyville, Ky.

KNIGHTS OF MACCABEES HAD ENJOYABLE TIME

Hartford Tent No. 99, Knights of the Macabees, had a most enjoyable time last Thursday evening and night. It was the occasion of their supper which had been announced beforehand, and there was a large number of Knights present. The supper was set in the large dining hall adjoining the lodge room and the festivities began about 7:30 p.m.

Sir Knights R. R., W. H. and L. T. Riley had been appointed as a committee by the lodge to arrange for the supper, and they gave the affair over into the hands of the ladies of the Christian Church of Hartford. These ladies prepared an abundant repast and served it in elegant style. It was one of the very nicest suppers ever given in town, served in three-course fashion. The menu and the serving were highly praised by all the Knights present.

At the conclusion of the supper,

which included cigars for all, the Knights repaired to their lodge room, where a regular session was held and the semi-annual election of officers occurred. The election resulted as follows: Commander, R. T. Collins; Past Commander, R. R. Riley; Lieutenant Commander, Heber Matthews; Record Keeper, Martin Thomas; Chaplain, E. G. Schroeder; Physicians, Drs. Pendleton and Riley; Sergeant, Allison Barnett; Master-at-Arms, Henry Nall; First Master of the Guard, H. D. Ross; Second Master of the Guard, A. D. Kirk; Sentinel, A. I. Nall; Picket, Arthur Petty. These officers will be installed at the regular meeting time, first Thursday night in July.

It was a most enjoyable occasion and everything passed off smoothly from start to finish.

BEAVER DAM.

June 8.—Mr. Orval Taylor, son of Dr. and Mrs. S. D. Taylor, who has been in the employ of the I. C. Railroad Co., as civil engineer, for the past several years and located at Ft. Dodge, Ia., was married to Miss Ella Northrop, of that city, the 22d of last January. He kept the marriage a secret from the family until he brought his wife home last Saturday and presented her to father and mother as their new daughter. She comes of one of the first families of that city and is highly educated.

They stay at the old home was brief they returning to Ft. Dodge, but will shortly move to Princeton, Ky., where they will make their future home. Mr. Taylor will superintend the building of a double track on the I. C. from Paducah to Princeton. Mr. J. T. Vinson, of Owensboro, has rented one of the storerooms of the new brick block of Mr. John H. Barnes, and will open a full stock of general merchandise the 20th of this month. Mr. Vinson bears the name of being a hustling merchant and will likely do well.

Mr. Clifford Maddox is in from the Georgetown College to spend vacation with his home folks.

Messrs. Frank Barnes and Presley Gray are at home from State University at Lexington to spend vacation with their parents.

Mr. Everett Likens, one of the graduates of the last term of our school, left last week for Stone, Ky., where he has a position in a store at that town.

Marshal Sam Stevens arrested Gordon Vick near Prentiss last week and took him to Owensboro where he was wanted for housebreaking.

Rev. Claude Chick, of Louisville, spent a few days in Beaver Dam last week visiting relatives. He leaves Tuesday morning for his new home in Brandenburg, Ky., where he has the pastorate of the Baptist Church.

Beaver Dam is suffering from a fearful drought. Have not had a rain since the 8th of May. The gardens are burning up but the wheat crop that is putting on its golden appearance, will be a full crop in this community.

For Sale.

Just received a carload of 24-inch well tiling.

W. E. ELLIS.

The Produce Merchant, 204 Center-town, Ky.

Announcement.

In view of the fact that in Ohio and adjoining counties there are offered no Summer Course in either Normal or High School Work, we have decided to establish such a course at Fordsville, Ky., beginning June 1, 1914, and continuing eight weeks.

The object of this school is not to work against either of the State Normals, but to assist them in raising the educational standard of Kentucky, by bringing a first-class summer course nearer home.

Special attention will be given to training teachers for the June and July examinations, and, also, a very thorough course in High School work will be given to those who wish to teach such work, or lessen the time required to complete the High School work.

This school will be conducted by Prof. F. T. Schultz, who is an A. B. graduate of Kentucky State University and holds a State and Life certificate.

Students may enter and classify at any time.

For further information, write or see PROF. F. T. SCHULTZ, Fordsville, Ky. Board of Trustees.

A TEXAS WONDER.

The Texas Wonder cures kidney and bladder troubles, dissolves gravel, cures diabetes, weak and lame backs, rheumatism, and all irregularities of the kidneys and bladder in both men and women. Regulates bladder troubles in children. If not sold by your druggist, will be sent by mail on receipt of \$1.00. One small bottle is two months' treatment, and seldom fails to perfect a cure. Send for testimonials from this and other States. Dr. E. W. Hall, 2926 Olive Street, St. Louis, Mo. Sold by druggists.

lyl

OHIO CIRCUIT COURT.

The Ohio Circuit Court convened in Court Hall Monday for its two weeks June term, Judge T. F. Birchard presiding and Commonwealth's Attorney Ben D. Ringo and County Attorney C. E. Smith present.

The following named gentlemen were empaneled Monday as grand jurors for this term, viz: Rufus Williams, R. F. Taylor, H. E. Michigan, B. F. Allen, Charley Carter, H. T. Felix, J. C. Thomas, W. F. Howard, W. J. French, J. R. Cooper, D. H. Muffett and E. J. Bratcher. Mr. Rufus Williams was designated as foreman of the grand jury by the Court. Mr. H. T. Felix was selected as sheriff and Mr. E. J. Bratcher as clerk of the grand jury.

The following named gentlemen

ed his wife with a knife on her breast and neck, Sam Elliott, a well known farmer of the Sutherland neighborhood, cut his own throat from ear to ear with a barlow knife. Elliott is in a critical condition, although the physicians hope to bring him through. Mrs. Elliott, while she has a chance to recover, is frightfully injured.

As far as could be learned the affair was the result of family feuds of long standing. The shocking affair occurred at 4:30 o'clock Sunday morning. Monday night Elliott was resting as well as could be expected. His wife spent a restless day on Monday.

I. M. Nave, a neighbor, who lived

just fifty yards from the Elliott home, heard screams in the front room of the house at about 4:30 o'clock Sunday morning. As Elliott had been under treatment for nervous disorder, Mr. Nave thought perhaps he had changed for the worse. He dressed hurriedly and hastened to the Elliott home. He was met at the door by Mrs. Elliott

RED CROSS GAVE \$12,000,000 HELP

To Sufferers in the Last Nine Years.

GREAT INSTITUTION FOR GOOD Gave Aid in Over Seventy-five Disasters During That Period.**RELIEF IN MANY COUNTRIES**

Washington, June 6.—Twelve millions of dollars has been dispensed in charity by the American Red Cross in the last nine years.

In this period, beginning in 1905, when the Red Cross was reincorporated, there have been more than seventy-five disasters caused by earthquakes, volcanic eruptions, fires, floods, famine, mine explosions and wars in this and other countries.

Not included in the \$12,000,000 is the sum of \$1,800,000 that has been raised by the sale of Red Cross stamps. This fund is used exclusively for the war against the white plague in this country. In addition to extending relief to the needy in great calamities, the Red Cross continually fights tuberculosis, maintains a system of free nurses for the poor, looks after the safety of miners and has a volunteer life-saving force.

Friends of this organization declare it can be truthfully said that the American Red Cross is the greatest single institution for good in the world. Its records show that aid is extended at the least possible cost.

Ready and eager to answer a call for their services are 4,500 enrolled graduate nurses. During the last few years there has developed in this country the largest organization of trained nurses to be found in the world. The Red Cross, quick to realize the advantages of co-operation with this representative body of women, caused the affiliation of the American Nurses' Association with the Red Cross and a working agreement between the two bodies is carried out through a National Committee on Red Cross Nursing Service.

Through this nursing service the Red Cross has undertaken to carry into the homes of the people a better knowledge of the underlying principles of health, the prevention and care of a Town and Country Nursing Service, which, it is believed, will eventually make nursing care available even in the most remote regions of our country.

A record of the work of the Red Cross since 1905 is one recounting national calamities in all sections of the world, each a horror that started and raised the sympathies of the civilized world. In 1905 there was the Philippine typhoon. In 1906 there was the San Francisco earthquake and fire, the Japanese famine, the Vesuvian earthquake and eruption, the Valparaiso earthquake and the Gulf States storm.

The next year there was the Chinese famine, the Kingston earthquake and the Russian famine. The following year there was another famine in China, the Mississippi cyclone, the South Carolina and Georgia floods, the Monongahela mine disaster, the Canadian forest fires, the Michigan and Minnesota forest fires, the Calabrian earthquake, the Italian earthquake and the cyclone at Clinton, Mich.

Since 1908 the Red Cross has extended relief to Portugal, Turkish Armenia, Japan, Nicaragua, Servia, Costa Rica, France, China, Manchuria, Canada, Philippines, Mexico, Albania, Persia, Panama, Turkey, Syria and Newfoundland. Aid has been extended in the various wars that disturbed Turkey, Greece and the Balkan States.

Persons made destitute by the Tifane and Volturno ship disaster felt the helping hand of the Red Cross. Outside of the San Francisco earthquake and fire, which cost the Red Cross \$3,087,000, the next costly relief was in the Ohio floods of last year, when \$2,472,287 was expended.

Proposes Drastic Remedy.
 Editor E. B. Smith, of the Richmond Pantograph, proposes a dras-

tic remedy to stop the epidemic of burglary in many Kentucky towns. He says:

Burglarizing of residences still continues in Kentucky cities. Richmond had a siege of it last year; every town has its turn. These thieves are wonderfully slick, as they seem to escape capture wherever they go. As Col. W. P. Walton would say: "We are as mild a mannered man as ever cut a throat or scuttled ship," and not in the least bloodthirsty, yet we believe that a few doses of lead skillfully placed to be the best cure for these everlasting burglaries."

MAYO ESTATE SHOWS A LARGE SHRINKAGE**IS FAMOUS FOR ITS MINERALS**

Lexington, Ky., June 4.—Though her husband's estate shows a shrinkage from an estimated cash value of \$5,000,000 to about \$1,000,000, Mrs. John C. Mayo, of Paintsville, to-day became the most prominent business woman in the South, when it became known she will take a place on the directorates of the great development companies held by her husband. The estate controls vast holdings in coal lands, all estimated to be worth \$20,000,000.

Mrs. Mayo is thoroughly familiar with her husband's plans for business and philanthropy. Colleges will be endowed and several churches built, and, besides, many children who were cared for by Mr. Mayo will be under her care. Mrs. Mayo, by the will filed yesterday, was made executrix of the entire estate, without bond. She will continue to reside in Paintsville.

THE PRESENT VACANCY RECALLS "NEAR SENATOR"

The Louisville Times says: The present vacancy in the United States Senatorship from Kentucky, recalls the fact that after the memorable senatorial deadlock of the 1896 Legislature, Gov. Bradley appointed Judge A. T. Wood, of Mt. Sterling, Senator to succeed Senator Jo C. S. Blackburn, whose term had expired and the General Assembly had failed to elect his successor. Judge Wood, however, never got any further than the door of the Senate chamber, being refused admittance on the credentials he held, and he had to be satisfied with being a "near Senator." The seat remained vacant until W. J. Deboe, of Marion, was chosen by the Legislature as Blackburn's successor.

He Knew The Answer.
 His name was Tommy, and he came home from school looking so down in the mouth that Mother asked him severely what was the matter.

Out of his little trousers pocket he fished a note from his teacher, which said, "Tommy has been a very naughty boy. Please have a serious talk with him."

"What did you do?" asked Mother.

"Nothing," sobbed Tommy. "She asked a question, and I was the only one who could answer it."

"H'm," murmured Mother, "What was the question?"

"Who put the dead mouse in her desk-drawer?" answered Tommy.—June Lippincott's

NO TRACE OF MISSING GIRL.

No trace of the body of Catherine Winters, who has been missing from her home at Newcastle, Ind., for more than a year, was found when a disused well at the former home of her father was opened. A detective in the case hints at other arrests in addition to that of the father and step-mother of the missing child and a roomer in their home.

ENDORSED AT HOME.**SUCH PROOF AS THIS SHOULD CONVINCE ANY HARTFORD CITIZEN.**

The public endorsement of a local citizen is the best proof that can be produced. None better, none stronger can be had. When a man comes forward and testifies to his fellow-citizens, addresses his friends and neighbors, you may be sure he is thoroughly convinced or he would not do so. Telling one's experience when it is for the public good is an act of kindness that should be appreciated. The following statement given by a resident of Hartford adds one more to the many cases of Home Endorsement which are being published about Doan's Kidney Pills. Read it.

Henry Nall, Hartford, Ky., says: "I had pains in my back and in my sides. Seeing Doan's Kidney Pills advertised, I procured a box at the Ohio County Drug Co. They did me a world of good. I recommend Doan's Kidney Pills to anyone suffering from kidney trouble."

Price 50¢ at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Nall had. Foster-Milburn Co., Prop., Buffalo, N. Y.

MANY CONTRASTS FOUND IN MEXICO**WHERE OPPOSITES ABOUND ON EVERY HAND.****SOME STRANGE COMPARISONS**
A LAND RICH IN NATURAL RESOURCES, YET POVERTY IS EVERYWHERE.**IS FAMOUS FOR ITS MINERALS**

Perhaps nowhere else in the world is there a country so full of contrasts as Mexico. With a university established before John Harvard, Elihu Yale or William and Mary were born, the masses of its people are hopelessly ignorant. With a hospital founded before Jamestown was even dreamed of, it is one of the most backward regions of the earth in a medical way. With natural riches greater than those of a thousand Midases, its masses are just as poor as the proverbial church mouse. With the constitution as perfect as any organic law in the civilized world, it is a nation whose rulers always have been a law unto themselves.

Here you will see a Mexican half breed, barefooted, wearing a \$1 pair of trousers, a fifty-cent shirt and a \$10 sombrero. There, at a single glance and within the length of a single city block, you may see an Indian cangador, donkey cart, an oxcart, a carriage, a railroad train, a street car and a motor car—almost every type of locomotion since Adam. You may tread the burning sands of a tropical desert with the wet of perpetual snow of towering mountains still upon your shoes. You may take a single railway journey of 36 hours in which the people you see at the railroad stations will be dressed in four different weights of clothing. Everywhere you turn there is contrast, high lights and deep shadows.

Mexico probably has a greater range of remarkable vegetation than any other country in the world. The parrot fruit tree produces an odd shaped fruit, bearing a close resemblance to green parakeets. When the parakeet is frightened it makes a dash for the parrot tree, where it assumes a position which makes it look like the fruit itself. So close is the resemblance that their enemies, the hawks, occasionally fly by a tree on which a dozen or more of these birds are sitting, apparently unaware of their presence.

Another remarkable tree is the Arbol de Dinamite—dynamite tree—whose fruit, if kept in a warm place, bursts with considerable force and a loud report, scattering its flat seeds to a surprising distance. One of the most interesting fruits in Mexico is known as the melon apote, or papaya. It contains considerable pepsin, which reacts against both acid and alkaline conditions of the stomach, and it is said that a diet which includes papaya precludes dyspepsia. Both the fruit and the leaves possess the singular property of rendering tough meat tender.

When the pulp of the fruit is rubbed over a piece of tough meat, the juice attacks the fiber and softens it. Another country south of the Rio Grande is so well equipped with railroads. Prior to the Madero revolution it had twenty thousand miles of up-to-date American railroad, which carried 11,000,000 passengers annually and about 11,000,000 tons of freight. Their total revenues amounted to about \$40,000,000. The Government owns a controlling interest in the major part of the mileage of the railroads.

Mexico produces one-third of the world's silver, a considerable percentage of its gold, one-ninth of its lead and one-twentieth of its copper. The country's mineral production, exclusive of iron, coal and petroleum, amounted to \$158,000,000 in 1910. The famous iron mountain at Durango is estimated to contain 600,000,000 tons of iron ore, which is worth seven times the value of all the gold and silver mined in Mexico in two centuries. The Santa Maria graphite mines are the largest and most important in the western world. The region around the Gulf of Mexico is very rich in petroleum. One company at Poter del Llano struck a gusher which flowed 100,000 barrels of oil a day.

—[National Geographic Magazine.]

WOMEN OF COLORADO USE POLITICAL POWER

The power of the vote has never been demonstrated more clearly than in the incidents of the last few weeks in Colorado. When the women of Colorado formed the Women's Peace Association, their first act was

to call upon Gov. Ammons to send for Federal troops to end the bloodshed in the coal districts. One thousand women, among them several members of the Legislature, marched to the House chamber of the Capitol and insisted upon seeing the Governor, although he at first said he had no time for them. The women said they would wait.

When the Governor appeared they ordered him to do their bidding and he promised he would. The women waited until they knew the message was sent. They made no threats—just waited. Many of them were there from ten in the morning until ten at night. After a thorough investigation of conditions, the women of Colorado have now decided that the militia must not return to the strike fields. They have also pointed out that the Governor has unlimited police power and should use it for seizing the mines owned by the State and held by the coal corporations on long leases; also that the State should operate the mines, recognizing and employing union men. Can anyone doubt that the influence of the women has been greater in this crisis because they are voters than it would have been if they were merely wives, mothers and wage-earners?

ROBIN DELAYS A SALE UNTIL HER EGGS HATCH

A mother robin sitting on four eggs was the cause of a business deal, involving a considerable amount of money, being delayed at the Clysmic Spring Company's plant. Superintendent W. E. Stonely declared to a prospective purchaser that he would delay the sale of a set of pipe coils inclosed in a large tank until a brood of young robins had hatched and grown sufficiently to leave their home.

The coils and tank were recently removed from the plant. Within a few days a robin had chosen a place on the top of the coils for her nest, where the large circles of iron afforded protection from above. When Mr. Stonely went out with the prospective buyer to examine the pieces for sale he discovered the bird. His ultimatum followed.—[Waukesha Cor. New York Sun.]

For Infants and Children.

THE KIND YOU HAVE ALWAYS BOUGHT

Bears the Signature of

Dr. H. Fletcher

THE BIBLE.

The Book contains the mind of God, the state of man, the way of salvation, the doom of sinners and happiness of believers. Its doctrine is holy, its precepts are binding, its histories are true, and its decisions immutable. Read it to be wise, believe it to be safe, and practice it to be holy. It contains light to direct you, food to support you and comfort to cheer you. It is the traveler's map, the pilgrim's staff, the pilot's compass, the soldier's sword, and the Christian's charter. Here heaven is opened and the gates of hell disclosed. Christ is its grand subject, our good its design, and the glory of God its end. It should fill the memory, rule the heart and guide the feet. Read it slowly, frequently, prayerfully. It is a mine of wealth, health to the soul, and a river of pleasure. It was given you, here in this life, will be opened at the judgment, and is established forever. It involves the highest responsibility, will reward the greatest labor, and condemn all who trifle with its sacred contents.

Despair Deferred.

"He went to see the dentist the picture of despair, but came back with a smiling face—the dentist wasn't there."

Even in warm weather some people will put hot dressing on salad.

It Always Helps

says Mrs. Sylvana Woods, of Clifton Mills, Ky., in writing of her experience with Cardui, the woman's tonic. She says further: "Before I began to use Cardui, my back and head would hurt so bad, I thought the pain would kill me. I was hardly able to do any of my housework. After taking three bottles of Cardui, I began to feel like a new woman. I soon gained 35 pounds, and now, I do all my housework, as well as run a big water mill."

I wish every suffering woman would give

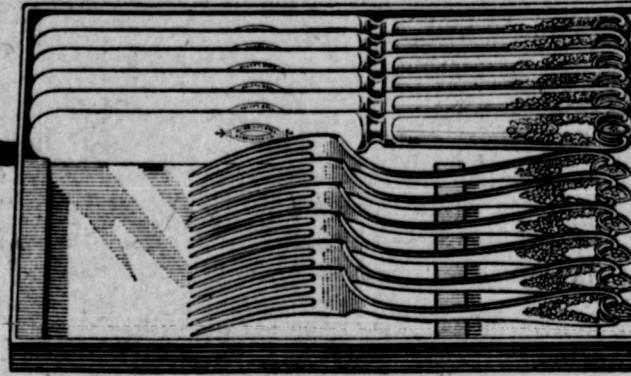

CARDUI

The Woman's Tonic

a trial. I still use Cardui when I feel a little bad, and it always does me good."

Headache, backache, side ache, nervousness, tired, worn-out feelings, etc., are sure signs of womanly trouble. Signs that you need Cardui, the woman's tonic. You cannot make a mistake in trying Cardui for your trouble. It has been helping weak, ailing women for more than fifty years.

HOW DOGS WORRY AND INJURE SHEEP FLOCKS

Sheep, Once Thoroughly Frightened Never Get Along
Well Afterward.

Herbert Quick, editor of Farm and Fireside, the national farm paper published at Springfield, Ohio, is writing for his publication a series of articles showing the immense damage done to the sheep business of the United States by worthless dogs. He says that this damage amounts to tens of millions of dollars a year. In the current issue of his paper he writes in part as follows:

"It seems probable that very few legislators and comparatively few owners of worthless dogs are aware of the peculiar way in which the worrying of dogs affects a flock of sheep. If the damage were confined merely to the killing and eating of a sheep or two, the dog evil would be bad enough, it is true, but very small compared to its actual magnitude."

"Mr. John Pickering Ross writes us of an experience of his own in which three or four dogs killed the English sheep dog that was defending the flock, and then ravaged the flock itself. 'Four of the ewes,' says Mr. Ross, 'were devoured and four more had to be put out of their misery, and several others had been badly mauled. In the end we raised but 35 instead of the 125 I had reasonably expected.' A member of the sheep-breeding firm of W. M. Bingham's Sons, of Adams county, Pennsylvania, writes: 'It is not often that dogs kill many sheep in a flock. By far the greatest loss is

in fright to the flock. The frightened sheep never do any good afterward; they live in constant fear of another attack by dogs, and their usefulness is over.'

"Under date of October 18, 1913, Mr. C. M. Brettell, of Bennington county, Vermont, writes us that one flock was entirely destroyed in his neighborhood that fall, and that the surviving sheep in another flock were at that time doing no good on account of being so badly frightened, even though they were not touched by the dogs. They seem so nervous," he writes, "that they will not go out to feed for fear of dogs getting among them again." Speaking of his losses by dogs, Mr. George Schapp, of Marion county, Oregon, says: "As to the damage they did in addition to killing three ewes, about half of my ewes lost their lambs owing to over-exertion and fright. My sheep are all registered Shropshires." Prof. E. J. Iddings of the University of Idaho agrees with these sheep owners. "A very slight injury to a sheep by a dog," says he, "and a little worry, will as a rule be fatal."

**HUERTA'S TOTAL
FORCE IS 60,000****All Mexico In Sympathy
With Revolt,****SMS KNOWING INVESTIGATOR****Rebels Are Deceiving Their
Followers—Taking Capital Will Be Hard.****INTERESTING WAR COMMENT**

Vera Cruz, June 6.—Captain W. A. Burnside, formerly military attaché at Mexico City and now intelligence officer of Brigadier General Winston's force, submitted a memorandum to-day on the strength and disposition of Huerta's troops and summarizing the territorial division between the Federals and the Constitutionalists. He estimates the total number of Huerta forces including police, students and civil service employees, at 60,000.

The memorandum says that the estimates are liberal, although the newspapers controlled by the Huerta administration are claiming considerably more. As to the Constitutionalists the note says:

"Practically the entire country is in sympathy with revolution, and the pacified condition in many places is due to intimidation or indifference. For the purpose of robbery and the appropriation of property probably 150,000 armed men claim to be revolutionists."

However, the armed revolutionaries having an organization and being actually under fair control of their leaders are estimated at about 20,000."

Of the Huerta forces the reports indicate that about 8,000 are scattered along the railroads between Vera Cruz and the capital and that the garrison at Mexico City numbers 13,000, including students and Government employees. The estimate is made of only 3,000 regulars in the capital.

The strongest Federal garrisons, of 6,000 each, are at San Luis Potosí and Aguascalientes, with 3,000 at Guaymas. The estimates show no considerable Huerta forces in the immediate vicinity of Vera Cruz.

Referring to the situation at Tampico and Tuxpan, now in Constitutional hands, the memorandum states that the officers there are deliberately deceiving the men in the ranks regarding Vera Cruz, declaring that that city is held by the followers of Carranza. To the direct question as to whether this was being done, the rebel officers replied, "Yes." At the present time it is not convenient to let the men know that Vera Cruz is in the hands of the Americans."

The memorandum states that little military activity or efficiency can be expected from the Constitutionalists at Tampico and Tuxpan, because they are not led as ably as those directly under Villa.

According to the reports received Guaymas, Mazatlan, San Luis Potosí and Zacatecas are the only Federal garrisons north of the twenty-second parallel. They merely hold the towns, controlling little of the surrounding territory. The routed garrisons of Torreón, Saltillo, Monterrey and Tampico are believed to be concentrating at San Luis Potosí.

"Outside of holding the points mentioned," the memo continues, "there can be no basis for the claim of Federal control north of the twenty-second parallel."

Captain Burnside points out that it is improbable that any sweeping general advance of the Constitutionalists on Mexico City will be made, saying:

"It must be remembered that the Northerners would then be getting away from the home territory, the only part of Mexico they really understand, and it would not be at all surprising if the leaders experienced difficulty in inducing the men to make a further Southern advance. It is only recently that the Mexican Revolutionists have shown capacity for organizing in one section of the

country and operating away from their 'tierra,' and even now this progress in the art of war is confined to the Northerners led by Villa."

Discussing the probable next movements of Villa's troops on the capital, Captain Burnside sees no possibility of the success of that campaign for many months. He says that even with San Luis Potosí taken, which is not yet accomplished, the Constitutionalists will have to fight their way 315 miles to the capital through the concentrated forces of the Federals, now fully supplied with arms and ammunition. In his own opinion the battle would be apt to result in "the usual Mexican fashion—a draw."

He points out that of first importance after San Luis Potosí are Gonzalez Junction and Celaya, which dominate the railroad lines supplying the capital with the bulk of the native food supplies. It is certain, he says, that desperate resistance to the advance would be encountered there.

The memorandum says that the Constitutionalists have made an important advance in the capture of Tampico, because it cuts off much of the Federal fuel-oil supply and also opens a route for arms and supplies to the Constitutionalists. They control the Tampico-San Luis Potosí road sufficiently for this purpose.

Captain Burnside dismisses the Zapatistas as "not able successfully to operate, except in the immediate vicinity of their homes." He declares that the bandit arms supply comes from the defeated Federals sent out from the capital. He estimates the Zapata forces at 15,000 in scattered bands.

**THE OHIO COUNTY FARMERS'
MUTUAL TELEPHONE
CO., (Incorporated)**

To-day the farmer does not have to be told of the importance of the Telephone in his daily life and work.

They have learned that the Telephone is no longer to be considered a luxury but a necessity for successful farm life. It keeps him posted on the markets, so that he may buy and sell to advantage. It calls the doctor day or night. It calls the friend for a social chat and the merchant or professional man for business matters.

It tells when and where repairs can be had for all farming implements as well as the place to buy new ones at your command, on short notice, and considering the matter from a dollar and cents standpoint only, the farmer has decided there is nothing in which he can invest which will yield as great profit for so small investment as a telephone connected with the Ohio County Farmers' Mutual Telephone Co., (Incorporated), for they have access to all telephones connected in the entire system and all connecting companies. If you are not in connection with this system write for particulars at once.

Cures Stubborn, Itchy Skin Troubles

"I could scratch myself to pieces" is often heard from sufferers of eczema, tetter, itch and similar skin eruptions. Don't scratch—stop the itching at once with Dr. Hobson's Eczema Ointment. Its first application starts healing; the red, rough, scaly, itching skin is soothed by the healing and cooling medicines. Mrs. C. A. Einfeldt, Rock Island, Ill., after using Dr. Hobson's Eczema Ointment, writes: "This is the first time in nine years I have been free from the dreadful ailment." Guaranteed 50¢ at your druggist.

MAXWELL.

June 8.—There was quarterly meeting at New Bethel Saturday and Sunday with a large attendance.

Mr. Wilbur Stevens, of Nuckols, spent Saturday night with Mr. G. E. Barr, here.

Quite a large crowd attended Sunday School here Sunday afternoon.

Mr. Forrest Bell returned from Bowling Green Saturday where he had been in school for the past few months.

Mr. Arthur Bell, Hubert Wright and Truman Salmon will return home Thursday. They have been in school at Bowling Green for some time.

Mrs. Eliza Hinton, of Browns Valley, is visiting relatives and friends here.

Rev. Thompson, of Owensboro, spent Saturday night with Mr. and Mrs. J. D. Crowe, here.

Stomach Troubles.

Many remarkable cures of stomach troubles have been effected by Chamberlain's Tablets. One man who had spent over two thousand dollars for medicine and treatment was cured by a few boxes of these tablets. Price, 25 cents. For sale by all dealers.

SULPHUR SPRINGS.

June 8.—Mr. Editor, I have just eaten a gooseberry pie sweetened with low tariff sugar and am feeling pretty good, I thank you.

Farmers are about through planting corn and the ground is too dry to break until it rains, and if it doesn't rain soon there will be no more planting done unless tobacco growers plant the ground, in corn that has been prepared for tobacco. The continued dry weather is very detrimental to meadows, oats and pastures. Wheat and rye both looking well and will soon do to eat.

Weather so far is the hottest on record for this season; in fact the sun shines so hot that Tony Miller has built an addition in front of his last year's straw hat.

Mrs. Hendrix, wife of Ed. Hendrix, and her niece, Miss Oakley Roach, of Jingy, started to Mt. Vernon last Sunday morning driving a mule to a buggy and when about a mile from home the mule became unmanageable and ran down a rocky hill and threw them both out of the buggy. Mrs. Hendrix sustained severe injuries, one or more ribs were broken; her head was badly cut and bruised and her skull fractured and she sustained severe other bruises. Drs. Stewart, of Dundee, and Godsey, of Sulphur Springs, were called and dressed the wounds and at this writing she is resting as well as could be expected, but is in a very precarious condition. Miss Roach escaped serious injury but sustained several painful bruises. The mule is a good servant but a very bad master and at all times dangerous at both ends.

BARRETT'S FERRY.

June 8.—The rain last Friday afforded a very light tobacco season, but nevertheless, almost everyone who intends to raise tobacco, set a few thousand plants.

Sunday was decoration day for both the M. W. of A. and the W. O. W. lodges. The Modern Woodmen of this vicinity held services at the Midkiff burying grounds in the morning, and at Sugar Grove in the afternoon. The Woodmen of the World held services at Olaton in the morning and at New Baymus in the afternoon.

Solomon, the 7-year-old son of Mr. Milton Lloyd, died Saturday evening at 4 o'clock after being sick about ten days. The child is supposed to have had appendicitis. The remains were interred in the Pleasant Grove cemetery Sunday afternoon.

There was a baptizing at this place last Tuesday. Rev. Brown conducted the services. Those immersed were, Messrs. Mike Bratcher and Forrest Day.

At the regular meeting of the trustees of Educational Div. No. 3, at Dundee last Saturday, Mr. Morris T. Gentry was elected to teach the New Baymus school. Miss Maude Miller will teach the Beech Grove school.

Mr. Willie Harl and wife, who have been visiting Mrs. Harl's

parents, near Eureka, Ind., returned home last Wednesday.

Miss Stella Hari and little niece, Gladys, are visiting relatives in Owensboro.

Messrs. Woodford Shultz and Palmer Lloyd, who are employed in the John Deere Plow works of Moline, Ill., visited relatives here from Sunday until Wednesday.

Several from this place attended the W. O. W. unveiling at Pleasant Grove yesterday.

RALPH.

June 6.—A good rain is badly needed at this place.

Mr. Henry Greer and family, of Cannetton, Mo., are visiting friends and relatives here and at Magan.

Mrs. Belinda A. Patton, of Adaburg, has returned home from an extended visit to her son, Mr. C. L. Patton, of Newburg, Ind., and her daughter, Mrs. Sarah Ralph, of Evansville, Ind.

OLATON.

June 8.—It is still hot and dry with us. We can hear of rain in different places in the county but it missed Olaton. We had a little shower Thursday—about enough to lay the dust.

Mrs. Holdman, of Philpot, is visiting her mother, Mrs. Graves, and her grandfather's family, Bro. Jake Westerfield. She will be here for several days.

Mrs. Mercedes C. Duncan and Master C. C. Duncan have returned home. They have been visiting Mrs. Duncan's parents for a few days.

Miss Pauline Miller, of Louisville, is visiting her grandparents, Mr. and Mrs. William Lyons.

Misses Lula Crowley and Myrtle E. Canan went to Pleasant Grove to the unveiling Sunday.

The Woodmen decorated the graves of Charles Stevens at this place Sunday and Robert Day at New Baymus. There was a fair crowd out at both places.

Dr. C. W. Felix left Olaton Wednesday for Nelson, Ky., where he will take Dr. James Duff's place. While we regret to give Dr. Felix up we are glad to know that he has a good location for his profession. It leaves Olaton without a doctor. The territory of Olaton has been split up for several years. Some want a doctor to furnish his own medicine while a majority want a druggist to furnish the medicine. Unless we get a doctor who will patronize the druggist it will remain a split territory. There was once a time when Dr. C. W. Felix made good money at Olaton. He and the druggist both, but since the doctors undertook to furnish their own drugs it has been

a pull back on both doctors and druggist. If a doctor will come here and patronize the druggist he ought to make \$2,000 a year.

William Keith departed this life Wednesday night about 12 o'clock. He had been sick quite a while. Mr. Keith was one of Olaton's oldest and best citizens. He was 64 years, 3 months and 3 days old. He leaves a wife and several children to mourn his loss. He was buried in the Olaton cemetery to await for that great judgment day.

We had quite a lively race in Olaton last Thursday when Deputy Sheriff C. L. Wedding undertook to arrest one Herbert Lynch. When Mr. Wedding found he would not surrender he thought to try his gun on him, so he shot two or three times at Lynch but it only made him run the faster. He came through Olaton as fast as his horse would carry him. Lynch made no halt in Olaton. He made for the Grayson county line where they feel safe—for awhile, at least. The Grayson county line is only about one mile from Olaton and it is a great shield for the evil doers. Near the line you have to be wide awake if you catch the Olaton boys. There is so many telephones in the county that they keep one another posted.

Will McDaniel and Henry Felix go to Hartford to-day to serve on the jury.

Shake Off Your Rheumatism.

Now is the time to get rid of your rheumatism. Try a twenty-five cent bottle of Chamberlain's Liniment and see how quickly your rheumatic pains disappear. Sold by all druggists.

Bank the balance. The difference between Ford cost and heavy car cost is "velvet" for the prudent buyer. He knows the Ford not only saves him dollars but serves him best. It's a better car sold at a lower price.

Five hundred dollars is the price of the Ford runabout; the touring car is five fifty; the town car seven fifty—f. o. b. Detroit, complete with equipment. Get catalog and particulars from

Seventh Annual Celebration Sale

Began Monday, April 13, at 8:30 A. M. and Brings Savings Unequalled In Our History

**SEND US YOUR
MAIL ORDERS**

And we will fill them promptly and with the greatest accuracy. Our Mail Order Department is in the hands of expert shoppers, who are thoroughly capable of handling your transactions to your entire satisfaction. Write for our attractive booklets of the newest Spring Silks, Dress Goods, Infants' Wear, Etc.

Monday we began our Seventh Celebration Sale to fittingly commemorate the period of our occupancy of this building, and we have every reason to believe it will eclipse anything of its kind ever held in Louisville.

This store, which has for over sixty years been known as the South's leading department store, was forced to seek more commodious quarters, owing to such a largely increased business. As a result we now possess one of the most representative plants in the United States, containing, as it does, nearly seventy complete departments, and being a part of the greatest buying organization in this country.

We have spent many weeks in preparing for this event in order to make it supreme in point of magnitude, varieties and values involved, and we now have ready for you the most tempting of offerings in reasonable merchandise.

**PARCEL
POST**

We prepay by parcel post all parcels that come within the postal regulations, not exceeding eleven pounds in weight, to all points in the first, second and third zones, from Louisville. When ordering give rural route number.

THIS SALE CAN SUPPLY YOUR EVERY NEED AT A SAVING

The scope of this sale is so large that it is intended to supply everyone's needs at a saving, whether that need be for the most inexpensive of merchandise, or for the handsomest procurable. You should make it a point to attend as frequently as possible. Extra salespeople will be on hand to serve you.
